

Suleman Tariq

Lead Software Engineer

👤 Profile

Dynamic and results-driven Full Stack Developer with nearly four years of hands-on experience in creating high-performance web applications using React, Node.js, and Next.js. Proven track record in leading complex projects, optimizing application performance, and collaborating with cross-functional teams to deliver intuitive and scalable solutions. Skilled in implementing CI/CD pipelines and maintaining cloud infrastructures on AWS and GCP. Passionate about leveraging cutting-edge technologies to exceed client expectations and drive innovation. My career highlight includes leading a project that boosted user engagement by 70%.

📁 Employment History

Lead Software Engineer at Lombard Standard, Tokyo, Japan (Remote)

September 2023 — Present

- Spearheaded the development and maintenance of the core Next.js web app for the company's prop tech SaaS product, enhancing user engagement by 70% and increasing customer retention.
- Achieved seamless AWS Amplify deployment, integrating EC2/Lambda/DynamoDB for scalable data management, reducing server response times by 25%.
- Engineered advanced features such as real-time chat and AI content streaming, which boosted user interaction by 30%.
- Prioritized user needs through cross-functional collaboration, leading to agile feature development and a user-centric application, resulting in a 20% increase in user satisfaction scores.

Software Engineer at Emerssive Solutions, Lahore, Pakistan (Hybrid)

January 2021 — August 2023

- Engineered web applications using React, Node.js, and Ruby on Rails, boosting application performance by 25% and reducing load times.
- Pioneered mobile application development with React Native, delivering high-quality user experiences and increasing mobile user engagement by 70%.
- Designed and implemented custom and public applications for Shopify merchants, increasing customer engagement.
- Mentored and led a team of 3-4 junior developers, fostering their growth and ensuring high-quality code output, which resulted in a 10% improvement in team productivity.
- Led cross-functional team collaborations to deliver robust software solutions, ensuring project success and reducing development time by 30%.
